## Optional Tripod

**Part No. IAREATRIPOD**  
(sold separately)

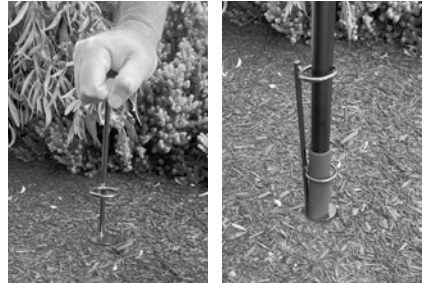

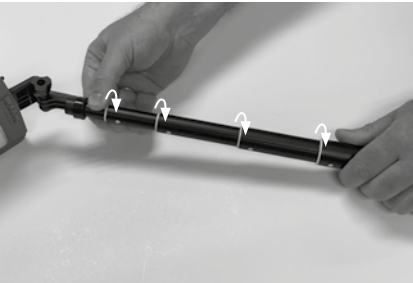

# Assembly

1. Connect the Wireless Receiver and 12VDC Cable to the LED Panel.

2. Secure Mounting Stake in a suitable location and mount pole.

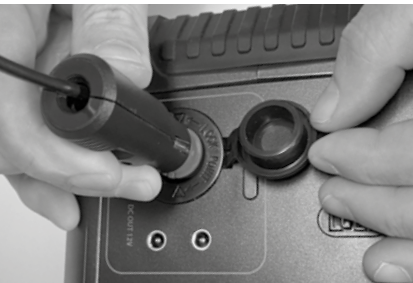

3. Extend pole to desired height, gently twist to secure in place.

4. Remove Battery Isolating Strip from Wireless Controller.

*\*Note the removal of the isolation strip is for first time only.*

5. Connect to a suitable 12VDC power source.

# Operation

1. Once connected to a suitable 12VDC power source press the Power Button on the Remote Control.

2. The required brightness level can be selected by manual adjustment up or down.

**Note:** If required the light can be operated directly from the 12VDC input by removing the Wireless Receiver and connecting the power cable directly to the LED Panel.
